-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If the period for reply specified above is the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months from the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1a) Responsive to communication(s) filed on 05/31/2001.
2a) This action is FINAL. 2b) This action is non-final.
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4) Claim(s) 1-32 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5) Claim(s) _____ is/are allowed.

6) Claim(s) 1-32 is/are rejected.

7) Claim(s) _____ is/are objected to.

8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.
10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152

Priority under 35 U.S.C. § 119

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) All b) Some * c) None of:

1. Certified copies of the priority documents have been received.
2. Certified copies of the priority documents have been received in Application No. _____.
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) Notice of References Cited (PTO-892)
2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
4) Non-Final Office Action (Mod. Date: _____)
5) Interview Summary (PTO-413)
6) Paper No(s)/Mail Date: _____
7) Notice of Informal Patent Application (PTO-152)
8) Other: _____

DETAILED ACTION

1. This office action is in response to "Mail Preparation System".

Information Disclosure Statement

2. The examiner consider the following Information Disclosure Statement submitted on
May 05, 2001

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Salim Kara (US Patent Number 5,510,992).

As Per Claim 1:

A mail preparation system, including:

 a postage charge dispenser configured to generate postage indicia and account for postage charges;

 a printer operable to print the postage indicia as generated by the postage charge dispenser on mail items, (Fig 1, element 19, printer/ label maker);

 a display, (Fig 1, element 13; display);

a controller (Fig 1, element 16; mouse) for driving the display to display a depiction of a postage indicium to be printed on a mail item, the depicted postage indicium including a plurality of data items modifiable by a user, which data items, (Fig 6, elements 60,607,608, 609,& 60; data items) include at least one data item related to postage charge, (Fig 1, element 601; postage charge) and being operable to provide data representative of the data items to the postage charge dispenser, (Fig 6, element 601, postage charge);

a data item selector operable by the user to select any one of the data items in the depicted postage indicium, (Fig 6, element 601; postage indicium) and cause the controller to drive the display to display a plurality of possible item entries for the selected data item; and

an item entry selector operable by the user to select one of the possible item entries for the selected data item and cause the controller to drive the display to display a modified depiction of the postage indicium including the selected item entry for the data item.

As Per Claim 2:

Kara discloses a method and system of wherein the data item selector comprises a screen-pointing device, (Fig 1, element 13,15 &16; display, keyboard and mouse).

As Per Claim 3:

Kara discloses a method and system of wherein the screen-pointing device

comprises one of a mouse, a tracker ball, a touch pad or a touch screen, (Fig 1, element 13,15 &16; display, keyboard and mouse).

As Per Claim 4:

Kara discloses a method and system of wherein the item entry selector comprises a screen-pointing device, (Fig 1, element 13,15 &16; display, keyboard and mouse).

As Per Claim 5:

Kara discloses a method and system of wherein the screen-pointing device comprises one of a mouse, a tracker ball, a touch pad or a touch screen, (Fig 1, element 13,15 &16; display, keyboard and mouse).

As Per Claim 6:

Kara discloses a method and system wherein the possible item entries for the selected data item are superimposed on the depiction of the postage indicium,(Fig 6, postage indicium).

As Per Claims 7 and 15:

Kara discloses a method and system wherein the data items include postage value, (Fig 6, element 601; postage value).

As Per Claims 8 and 16:

Kara discloses a method and system wherein the data items include postage class, (Fig 6, element 601; postage class).

As Per Claims 9 and 17:

Kara discloses a method and system of wherein the data items include date, (Fig 6, element 601; date).

As Per Claims 10 and 18:

Kara discloses a method and system of wherein the data items include destination (Fig 6, element 605; address box).

As Per Claims 11 and 19:

Kara discloses a method and system of wherein the destinations are represented on a map, (Fig 6, element 608; international destination).

As Per Claim 12:

Kara discloses a method and system of further including:
a weighscale for determining the weight of mail items, the weighscale being operable to provide data representative of the weight of a mail item to the controller and the controller being configured automatically to select the postage value for the mail item (Fig 1, element 103; scale and weight unit).

As Per Claim 13:

Kara discloses a method and system of preparing mail items, including the steps of:

displaying a depiction of a postage indicium to be printed on a mail item, the depicted postage indicium including a plurality of data items modifiable by a user, which data items include at least one data item related to postage charge;

selecting one of the data items in the depicted postage indicium to be modified;

displaying a plurality of possible item entries for the selected data item;

selecting one of the possible item entries for the selected data item;

displaying a modified depiction of the postage indicium including the selected item entry for the data item;

generating a postage indicium corresponding to the modified depiction of the postage indicium; and

printing the postage indicium on a mail item, (Fig 6, method for preparing mail items).

As Per Claim 14:

Kara discloses a method and system wherein the possible item entries for the selected data item are superimposed on the depiction of the postage indicium, (Fig 6, postage indicium).

As Per Claim 20:

Kara discloses a method and system of further including the step of: weighing the mail item, whereby the weight of the mail item is utilised automatically to select the postage value for the mail item, (Fig 1, element 103; scale and weight unit).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Asher Gil (US Patent Number 4,868,757).

As Per Claim 21:

Gil discloses a method and system preparation system for preparing batches of mail, the system including:
a message transmitter operable to transmit messages relating to batches of mail to a remote data center;

a message receiver for receiving messages from the remote data center as an acknowledgement in reply to each transmitted message;

a display for displaying message areas corresponding to each transmitted message; and

a controller for operating the display to display the message areas with a first visual appearance on transmission of the respective messages to the remote data center and a second, different visual appearance on receipt of the respective messages from the remote data center, (Fig 5, displaying the interconnection in combination with mailing address apparatus).

As Per Claim 22:

Gil discloses a method and system wherein the controller includes a time-out function for displaying message areas with a third, different visual appearance where a message is not received from the remote data center within a predetermined period of time following transmission of the message to the remote data center, (Fig 1, element 1; electronic display screen).

As Per Claims 23, 28 and 29:

Gil discloses a method and system wherein the different visual appearances are represented by different colours, (Fig 1, element 1; electronic display screen).

As Per Claims 24 and 30:

Gil discloses a method and system wherein the different visual appearances are represented by different shades, (Fig 1, element 1; electronic display screen).

As Per Claims 25 and 31:

Gil discloses a method and system wherein the different visual appearances are represented by different patterns, (Fig 1, element 1; electronic display screen).

As Per Claims 26 and 32:

Gil discloses a method and system wherein the different visual appearances are represented by different characters, (Fig 1, element 1; electronic display screen).

As Per Claim 27:

Gil discloses a method and system of preparing batches of mail, the method including the steps of: transmitting messages relating to batches of mail to a remote data center;

receiving messages from the remote data center as an acknowledgement in reply to the transmitted messages; and

displaying message areas on a display corresponding to each transmitted message, the message areas being displayed with a first visual appearance on transmission of the respective messages to the remote data center and a second, different visual appearance

on receipt of the respective messages from the remote data center (Fig 5,displaying the interconnection in combination with mailing address apparatus).

Conclusion

Any concerns in regard to this communication, the examiner **Jon Bass** can be reached at **(571) 272-6905** between the hours of **9-6pm Monday through Friday**. The fax number for the establishment where the application is being process is **(703) 872-9306**.

If an attempt to reach the examiner is unsuccessful for any reason, the examiner's immediate supervisor, **John Weiss** can be reached at **(571) 272-6812**.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-271-9197 (toll free).
